If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Fredrick Gibbs (reg. No. 37,629) on March 31, 2008.

2. The application has been amended as follows:

Regarding claim 1, the claimed limitations recited lines (22-26) have been deleted. i.e.,

“wherein the comparing step comprises determining whether the monitored delay period exceeds a first threshold delay period,

wherein the step of adjusting the number of connections is responsive to determining that the monitored delay period exceeds the first threshold to establish at least one additional connection,”

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

a) Steinwagner (US 2006/0075107) discloses a method of passing messages between a frontend and backend in a Web-based application.

b) Knobbe et al. (US 2002/0093917) discloses a method of calculating latency of Web appliances.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose, teach, and/or fairly suggest a method for managing persistent connections between data processing units of a computer system, wherein a first data processing unit is connected to a second data processing unit to send requests to the second data processing unit for processing, the method comprising the steps of (1) monitoring a communication delay period for requests transferred from the first data processing unit to the second data processing unit, wherein the monitored delay period is calculated by: computing a difference between (a) a timestamp associated with the transfer of the request from the first data processing unit to the second data processing unit and (b) a timestamp associated with the receipt at the first data processing unit of a response to said request from the second data processing unit, and subtracting a time period measured as the time processing the request within the second data processing unit and (2) calibrating the system to determine a first threshold communication delay period above which the establishment of at least one additional connection is expected to reduce the communication delay

period, wherein the step of calibrating the system to determine a first threshold comprises: determining a minimum number of concurrent clients at which a predefined percentage increase in throughput can be achieved by increasing the number of persistent connections by an integer value, a , between the first and second data processing units.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Feben M. Haile whose telephone number is (571) 272-3072. The examiner can normally be reached on 10:00am - 6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Aung S. Moe can be reached on (571) 272-7314. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
